

FACT SHEET SAP NETWEAVER SERVICES

SAP NETWEAVER BRINGS THE WHOLE SAP PICTURE INTO FOCUS

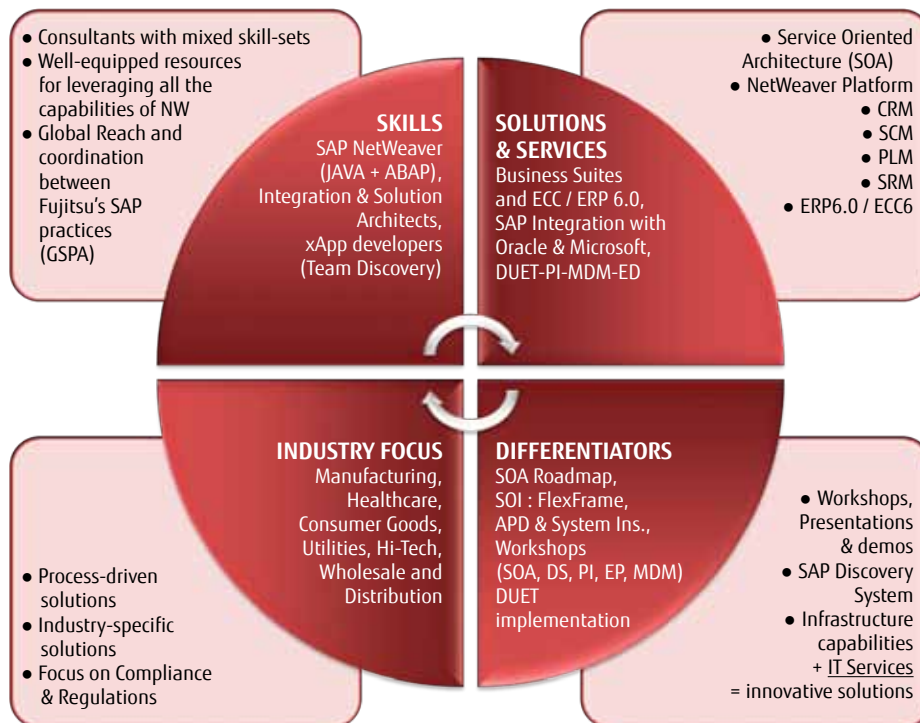

Considering that SAP NetWeaver is the underlying platform for all Business Suite Applications (ERP, CRM, SCM, PLM, SRM), and that it provides an open, service-oriented architecture (SOA) as its best practice approach, you can truly benefit from the multitude of services that our SAP NetWeaver practitioners provide around SAP’s innovative and strategic NetWeaver technology.

The following four highly-developed capability areas of our NetWeaver Competency demonstrate how we can help you in your learning process about NetWeaver, as well as in your ERP implementations, upgrades, infrastructure enhancements and more.

NETWEAVER CLIENT BENEFITS

The Fujitsu SAP NetWeaver competency leverages advanced technical capabilities to deliver innovative solutions. Our expertise helps you reap valuable benefits of the SAP NetWeaver platform in the following ways:

- Capitalize on existing IT assets by re-using existing functionality utilizing capabilities of the NetWeaver platform
- Provide better reporting and visibility through role-based analytics
- Conform to legal and operational requirements through the usage of the NetWeaver Governance Risk & Compliance (GRC) application capabilities
- Enable better information management across the enterprise by utilizing MDM, Enterprise Search, and Portals – all part of the NetWeaver Platform
- Provide multi-language capability with ECC- and Portal-based solutions
- Leverage Service-Oriented Architecture (SOA) to consolidate systems while simultaneously enabling a more agile system landscape

The overall structure of the SAP NetWeaver competency of Fujitsu is broken down into five key parts, each with its own set of component strengths:

- Platform Service Orientation
- Application Development & Composition
- Process Integration
- User Productivity
- Technical Infrastructure
